

Business Intelligence

Rababy & Associates, an intelligence and security consultancy, has taken the proven methods of intelligence collections, analysis and production and applied them to the business community. Adapting the methodologies, processes, architecture and technologies that transform raw data into meaningful and useful information to enhance your business.

The most common areas of focus include: reporting, online processing, analytics, trends, data mining, process mining, performance, benchmarking, text mining and most importantly predictive analytics using the proven intelligence cycle.

Our team works with you to determine your specific needs and requirements ensuring we hit the target. Once the requirements have been identified, we set forth in the collection process from a myriad of resources. Our trained and experienced analysis produce their analytical assessments which are packaged into the format the client requires. Our role does not cease upon dissemination but rather we continue to work with you to ensure new requirements are met.

Rababy & Associates (LLC) - Capability

Introduction

Founded in 2007, Rababy & Associates is a military, intelligence and culture consulting firm specializing in research, analysis and production of assessments for industry, academia and the government.

The information revolution of the 21st Century can be overwhelming and often contradictory. The analysts at Rababy & Associates specialize in capturing the pertinent and critical information from the "noise" and presenting the data in a usable format in the most timely manner.

Rababy & Associates helps "quiet" the noise by providing tailored assessments and estimates saving our clients time and money. We have applied the tactics, techniques and procedures utilized in the production of classified intelligence to the unclassified world of industry and government.

R&A has assembled a small team of experienced analysts who possess over 100 years of combined experience in the collection, analysis and production of finished intelligence products tailored to our clients needs.
